# IRON MINES PARK

Meagher County, Montana

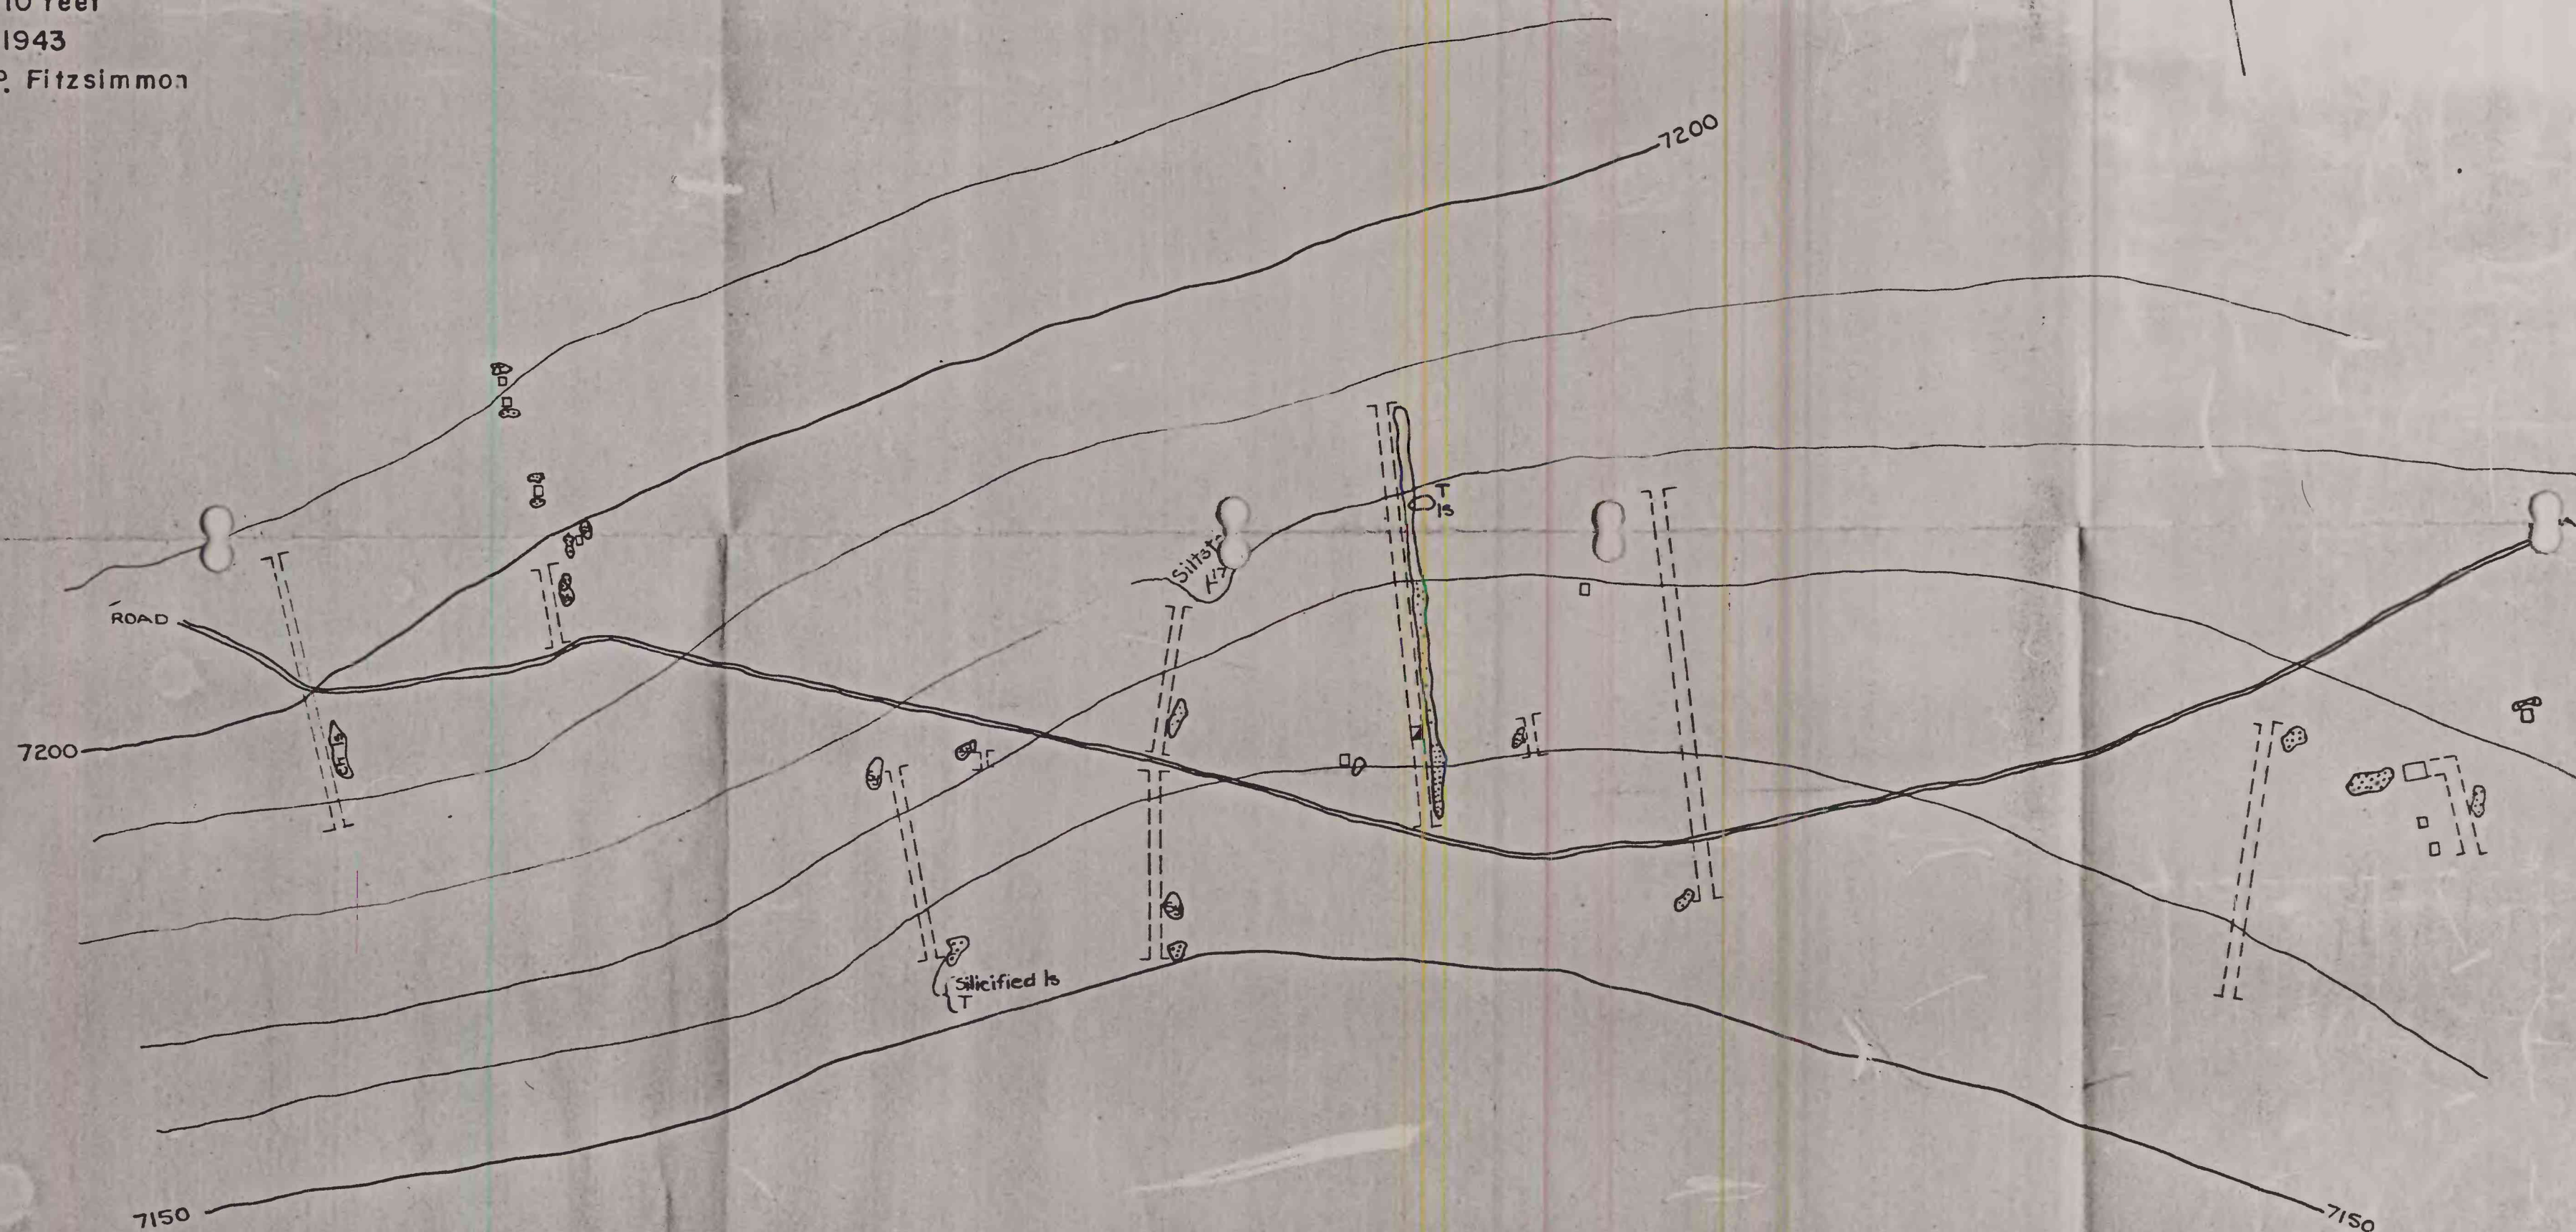

Scale 1 inch = 100 ft.

Contour Interval 10 feet

Surveyed July 1943

G. E. Goodspeed and J. P. Fitzsimmon

U. S. Geological Survey  
Spokane Regional Office

## EXPLANATION

Shallow trench

Pit

Shaft

Dumps

Relative number of dots  
indicates relative abundance  
of ore.

T, ch, ls, indicates presence  
of trachyte, chert, and limestone  
respectively on dump.

Remainder = weathered rock and soil
